

**VI International Conference on Legume Genetics and Genomics (VI ICLGG)**

will be organized in Hyderabad, the 400-year old city of Andhra Pradesh of India during October 3- 8, 2012. The event is bringing together scientists working on research aspects of legume biology in model species, using genetic and genomic tools, with those working on applied aspects and breeding of food legume crop and pasture species. The scientific program of this meeting will include plenary talks of general interest and focused special sessions featuring current research in legumes genetics and genomics from around the world. In addition, the programme will have some workshops on topical subjects, contributory presentations from the selected abstracts and dedicated poster sessions.
